

Precision Inventory for the Hardware & DIY Powerhouse

In the Hardware and DIY sector, inventory isn't just "stock" - it's working capital. advance2global brings you Onebeat, the AI-driven engine designed to eliminate the two biggest profit-killers in retail: stockouts on your bestsellers and overstock on you slow-movers

The Onebeat Advantage: Why Hardware Retailers are Switching

The Problem

The Onebeat Advantage

The "Ghost" Out-of-Stock

Daily Pulse Checks: AI spots sales spikes instantly (like weather-driven surges) and triggers replenishment before the shelf hits zero

Dead Wood & Seasonal Drag

Smart Pullbacks: Automatically identify slow-movers and move them to high demand locations or trigger profitable liquidations

The Contractor Churn

SKU-Level Precision: Ensure your "bread and butter" basics are always deep. Don't let a Pro-customer walk because you're short 3-inch screws

Inventory Silos

Intelligent Store Transfers: If store A is sold out of a premium drill kit while store B has five gathering dust. Onebeat triggers the move to capture the sale now

Hardware - Proven Results

We don't just move boxes; we move the needle on your bottom line.

90%

Sell- Through

Stop praying for a clearance sale. Sell your stock at full-price

33%

lower inventory

Free-up capital locked in overstock and put it back into the business

50%

higher turnover

Keep your inventory fresh and aisles clear of "dust-gatherers"

20%

more units sold

Beat the "markdown-trap" by having the right tool at the right time.

Zero-Friction Implementation

You're busy running your stores, not a tech company. Onebeat plugs into your existing POS/ERP and starts delivering actionable insights in **under 90 days**. No "rip and replace", just better results.
