

"If It's In Your Yard, It Should Be Sold, Period."

In the building materials trade, inventory is your highest investment and your greatest risk. Between volatile commodity pricing and the high cost of hauling heavy goods, you can't afford to let cash sit stagnant in the yard.

advance2global introduces **Onebeat**: the AI driven inventory engine that syncs your supply chain with the actual heartbeat of the construction site. We ensure you have the right grade of lumber, the right pallet of cement, and the right SKU of hardware - exactly when the contractor's truck pulls in

Built the Way Merchants Move

The Challenge

The "Project-Killer" Stockout

Commodity Price Traps

The High Cost of "Heavy" Freight

Yard Congestion (Dead Wood)

The Onebeat Advantage

Our Daily Pulse Sensing triggers replenishment based on local project surges, not just historical averages

Onebeat keeps you 33% leaner, protecting you margins from sudden market drops ensuring you hold the right inventory

Intelligent transfers identifies surplus at Branch A to fulfill demand at Branch B - ensuring 43% of moved stock sells within 30 days.

Our Automated Pullbacks identify slow-movers early, moving them to high-velocity locations before they become "permanent residents"

Hard-Hat Results: Performance by the Numbers

WE don't just provide data; we provide a measurable lift in your operational efficiency.

71%

stockout reduction

Near perfect availability for "A-List" items (fasteners, studs, drywall)

90%

sell through rates

Align your purchasing with real-time job site demand to max sales

60%

faster turns

Clear your yard of stagnant stock and keep cash flow fluid.

20%

full price sales

End the cycle of aggressive "clearance" pricing on seasonal stock

Implementation Without the Headache

A leaner, more responsive supply chain that protects your margins and secures the trust of your agricultural community. **Implementation take 90 days or less.**
